Ordered progression from fundamentals to interview-level problems. Click the LeetCode links in the PDF.

Important: A few requested topics (such as Aggressive Cows, Allocate Books, Bellman-Ford, Floyd-Warshall, Prim, and Matrix Chain Multiplication) do not have a standard one-to-one LeetCode problem page. Those entries use a LeetCode search link rather than a fabricated URL.

How to use the roadmap

- Try each problem yourself before reading a solution.
- Easy: ~15–20 minutes; Medium: ~25–35 minutes; Hard: ~40–50 minutes.
- Record the pattern, key observation, time complexity, space complexity, and why you got stuck.
- Re-solve failed problems after 1 day, 7 days, 21 days, and 45 days.
- Do not treat 250/250 as the finish line. After this, move to company-tagged problems, timed practice, and mock interviews.
